

## **General Required documentation for CATS & DOGS:**

- Valid rabies vaccination (older than 30 days and younger than 1 year) – some local airlines and all reputable kennels require it.
- Other vaccination – general Feline and Canine vaccinations are recommended and required if pet is going to be kenneled.
- TITRE Rabies antibody blood test – more and more countries require TITRE test to be done 90 days in advance, check with your consultant for the detailed procedures.
- Other Blood testing –often not required, your consultant will advise accordingly.
- Health certificate – always required, your consultant will supply you with the correct health certificate and all information required will already be filled in.
- AWB – your pet's flight ticket – we will supply you with it few days before your pet's departure.
- All original documentation has to travel with the pet.
- International pet relocation, from and to any worldwide destination.
- We will tackle every pet shipment regardless of its complexity or bizarre destination. If we cannot get your pet into a required location it is because there is a special embargo or restriction, not because we don't know how.
- Please note that flights for animals can only be booked approximately 10 days in advance, but the veterinary preparations and the communication with your consultant should be started weeks or months before your pet's intended date of travel.

### **Required documentation for CATS:**
